

## Vertical Pallet Garden

DIY - Demonstrated by  
Mark Visser

Exercise your  
green thumb and  
DIY skills - build a  
vertical garden

Tight for space? The  
vertical pallet garden is a  
great option to exercise  
that green thumb and  
grow some herbs for your  
kitchen.

### 1 Introduction

Everybody loves some fresh herbs in the kitchen - not everyone has the space. Upcycling this old pallet allows you to plant a variety of herbs without even if you don't have a big garden.

#### Required power tools:

- > Tackers
- > Cordless Impact Drivers
- > Sanders

#### Other accessories:

#### Detailed material list:

| pcs | Designation            | Length   | Width | Thickness | Material |
|-----|------------------------|----------|-------|-----------|----------|
| 1   | Old scrap pallet       |          |       |           |          |
|     | heavy duty plastic     | 2 meters |       |           |          |
| 4   | pinewood               |          | 20    | 12        |          |
| 4   | screws                 |          |       |           |          |
|     | utility knife          |          |       |           |          |
|     | measuring tape         |          |       |           |          |
|     | herbs/plants of choice |          |       |           |          |
|     | soil                   |          |       |           |          |
|     | pencil                 |          |       |           |          |

## **2 Preparing the pallet**

Remove excess pallet boards so that you have an even number on each side. Don't forget to remove any old nails and sand back to remove rough edges and prevent splinters.

## **3 Measure up the plastic**

Cut the plastic sheet 100mm longer at each end, and 260mm wider than the gap in the pallet. For example if the gap is 130mm x 400mm then cut your piece of plastic to be approximately 400mm x 600mm.

## **4 Secure the plastic to the pallet**

Make a 30 mm fold along the long edge of your material, using your Cordless tacker secure along one side with a few staples. Tuck the remaining plastic into the gap area then continue to fold and secure to the remaining sides of the pallet.

## **5 Final trimmings**

To ensure the plastic is secure and looks neat use measure and cut the pine down to the length of your pallet. Align on top of the plastic and fix to the pallet with some screws.

## **6 Finishing touches**

Using the knife make a few drain holes in your plastic then fill with soil and your herbs/plants of choice.
