

## Fitting folding doors

Procedure:

How to make optimum use of your living space

Especially in small homes it is important to make maximum use of every space. Folding doors are particularly space-saving – and easy to install.

- 1 First of all, you measure the dimensions specified in the instructions at the frames or inner sides of the doors and mark them. Drill the holes at the marks.
- 2 Now mount the individual clips for the slide and counter rails.
- 3 Apply the supplied lubricant to the sliders, so that the door is easy to open and close later. Then slide both door halves into the slide rails.
- 4 Align the slide rail to the fitted doors in the door frame.
- 5 Attach the slide rail to the pre-mounted clips.
- 6 Saw a cutout for the skirting on both counter rails, which are fitted vertically on the door frame.
- 7 Finally, both counter rails are fitted to the mounting clips and both wings of the door are inserted into the rails.
- 8 Then fit the two front panels on both the right and left of the slide rail. The mounting clips, onto which the front panels are simply attached, are also used here.
- 9 Finally, insert the door handles into the pre-drilled holes on both wings of the door and screw them tight.
