

## A cool pumpkin

Scary bottle cooler  
**A cool pumpkin**  
 The pumpkin bottle cooler brings a really creepy atmosphere into your party room.

### 1 Introduction

Frankenstein, Dracula and Darth Vader are all looking forward to a scary Halloween party, too! The pumpkin bottle cooler brings a really creepy atmosphere into the party room. Instead of candlelight, this pumpkin dispenses chilled drinks to refresh spooky guests as a practical party gimmick. This absolute eye catcher is ready to cool the drinks within an hour. !

#### Required power tools:

- > PSA 700 E sabre saw
- > PSR 10,8 LI-2 cordless drill driver with holesaw accessory (adjust diameter to bottle size; in this case 6 cm)

#### Other accessories:

#### Detailed material list:

pcs	Designation	Length	Width	Thickness	Material
1	Large pumpkin (e.g. muscat pumpkin, winter squash)				
1	Bowl				
	Ice cubes				

### 2 Sawing through the pumpkin

First saw through the middle of the pumpkin from side to side. The Bosch PSA 700 E sabre saw makes easy work of it. Then hollow out the pumpkin.

Note: Do not, for hygienic reasons, use the pumpkin flesh to prepare food!

### 3 Drilling the holes

There will be no shortage of scary faces at the Halloween party, so on this occasion the pumpkin is given a different look. Holes are drilled in the top half of the pumpkin to hold bottles, maybe using the Bosch PSR 10,8 LI-2 cordless drill driver and a suitable holesaw.

#### **4 Filling the pumpkin**

Place a bowl full of ice cubes in the lower half of the pumpkin, pop the pumpkin lid on top, fill it with bottles and enjoy the spooky drinks that go with a Halloween party.

#### **5 Tip**

If you would like to give the bottles a Halloween facelift, download the motto labels from the Bosch homepage, print them on adhesive label paper and cut them out. Use water to remove the old labels from the bottles, and glue on the new ones. These drinks will definitely be liked, even by zombies and bloodsuckers!
