

## Ski coatrack

Sporty retro flair in the hall

### Ski coatrack

A different use for skis:  
Give your old skis a new  
life as sporty coatrack  
rails.

## 1 Introduction

Do you still have old skis gathering dust in a corner of your attic? Give them a new lease on life with the stylish retro ski coatrack. In only a few steps and with the right tools, you can have your skis looking just as stylish as they did on the piste.

### Required power tools:

- > Cordless combi drill

### Other accessories:

- > 3 mm wood drill bit
- > 8 mm masonry drill bit
- > Pencil
- > Possibly spirit level for checking

### Detailed material list:

pcs	Designation	Length	Width	Thickness	Material
2	Old skis				
7	Wall hooks				
	Wood screws for hooks	12 mm	3 mm		
4	Wall plugs and matching screws		8 mm		
	Cover caps for screws, black				

## 2 Fitting the hooks

First use a pencil to mark the position of the hooks on the cleaned skis. Then it's time to use the combi drill, which drills clean holes in the skis. Note: Use a metal drill bit on skis that have a metal core. Then screw on the wall hooks.

### **3 Fitting to the wall**

Now drill two holes on the back of each ski and mark the same hole spacing on the wall. Note: To drill the holes in the wall, you should now switch the bit in the combi drill to a masonry drill bit. Drill the holes and insert the wall plugs.

### **4 Hiding the screws**

Last but not least, put small cover caps on the skis to hide the screws. The sporty eye-catcher in your hall is then finished!
