

Snowboard shelf

Sporty flair for your kitchen

Cool snowboard shelf

Glasses, salt shakers and the like can now sit stylishly on this trendy kitchen snowboard shelf.

1 Introduction

Is winter now over and your snowboard has done its job? That's still no reason to throw it away! Give your old board a new lease on life as a trendy kitchen shelf.

You don't need much more than a rope, carabiner hook and a little DIY skill to make your snowboard a sporty eye-catcher for the kitchen.

Required power tools:

> Cordless combi drill

Other accessories:

> 10 mm metal drill bit

> Pencil

Detailed material list:

pcs	Designation	Length	Width	Thickness	Material
1	Old snowboard				
	Plaited rope, red/white, by the metre	3.5 m		9 mm	
2	Carabiner hook	80 mm	8 mm		
2	Eyeplates				
2	Spring eyelets		10 mm		
1	Metal ring			30 mm	

2 Sanding down the snowboard

First sand down the edges of the cleaned snowboard. This is really easy to do with a multi-sander. On the back of the board, mark four holes which will be used to hang it up. Also transfer these hole spacings onto the wall.

3 Fastening the rope

Use a combi drill to drill the holes in the board. Note: Use a metal drill bit on a snowboard that has a metal core. Then decide how high you want the shelf to be and fasten the rope to the snowboard with a knot at each hole.

4 Fitting the carabiner hook

Use a masonry drill bit in the combi drill to drill the holes in the wall. Then drill the holes and insert wall plugs. Fit the spring eyelet and the eyeplate, and connect the carabiner hooks.

5 Hanging the shelf

Finally, feed the ropes through the carabiner and now your speedy shelf is finished!
